

PRESCIO

Analytics & Financial Technology

DATA ADMINISTRATION

Prescio offers a wide selection of data administration services ranging from data warehousing to data marts, data modeling, data security, data visualization, and predictive analytics.

DATA ADMINISTRATION SERVICES

Data Warehousing

Prescio can help you migrate from legacy systems to new data warehousing environments as well as packaging new solutions for your real-time data needs. Our team is trained and educated in statistics and financial mathematics and can handle advanced warehousing requirements.

Data Mart

We create data marts for specific areas within a business department or for a niche business function. We also leverage business intelligence tools such as Tableau and QlikView.

Data Modeling

Prescio can manage large pools of structured and unstructured data for its clients. Using various data modeling techniques, Prescio defines and organizes data imposing constraints or limitations on the data placed within the structure.

Data Mining

Prescio offers data mining services and can analyze large data sets from multiple sources to discover patterns that help you make better decisions and manage risk. We have extensive experience with current data mining techniques in financial and banking environments.

Data Security

With new policies and legal requirements being introduced regularly, it has never been more important for businesses to secure their data. Prescio can guide you through existing and newly introduced policies and legal requirements to safely protect and store your critical data.

Data Visualization

At Prescio, we also offer a holistic approach to data visualization to create interactive and dynamic reports that deliver actionable insights. We leverage business intelligence and data visualization tools like Tableau, QlikView, Dplyr, and SAS Visual Analytics.

Predictive Analytics

We develop and utilize predictive analytics to sort through historical and real-time data; formulating models and analyses that project possible future outcomes.

With the right data, model, and assumptions, businesses can avoid past mistakes, duplicate success, or change course to reach their goals.

THE VALUE OF PRESCIO

- ▶ We are your partner and resource for a wide range of financial and technical solutions
- ▶ We help your business minimize operational costs
- ▶ We help you run your business more efficiently
- ▶ We help you assess and manage risk
- ▶ We remain cost-effective
- ▶ We remain flexible and accessible
- ▶ We remain stable and focused
- ▶ We maintain an experienced and knowledgeable team
- ▶ We complement and add value to your existing team
- ▶ Committed to researching, developing, and testing new concepts, ideas, and technology

Prescio is an analytics and financial technology consulting firm with decades of combined experience in risk management, financial modeling, systems and IT, data administration, and software development.

Partner with Prescio to develop technical business solutions and outsource or complement your existing team. Our talented analysts, engineers, and consultants are ready to assist you with your next project.
